

# MacBook Pro 13" Retina Display Early 2015 SSD Replacement

Replace the SSD in your MacBook Pro 13" Retina Display Early 2015.

Written By: Andrew Optimus Goldberg

## INTRODUCTION

Use this guide to remove or replace the solid state drive (SSD) in your MacBook Pro 13" Retina Display Early 2015.

### TOOLS:

- [P5 Pentalobe Screwdriver Retina MacBook Pro and Air](#) (1)
- [Spudger](#) (1)
- [T5 Torx Screwdriver](#) (1)

### PARTS:

- [MacBook Air 13" \(2015\) and MacBook Pro Retina 13" and 15" \(2015\) SSD](#) (1)

## Step 1 — Lower Case

- Remove the following ten screws securing the lower case to the upper case:
  - Two 2.3 mm Pentalobe screws
  - Eight 3.0 mm Pentalobe screws

## Step 2

- Wedge your fingers between the upper case and the lower case.
- Gently pull the lower case away from the upper case to remove it.

## Step 3

-  The lower case is connected to the upper case with two plastic clips near its center.
-  During reassembly, gently push down the center of the lower case to reattach the two plastic clips.

## Step 4 — Battery Connector

-  If necessary, remove the plastic cover adhered to the battery contact board.

## Step 5

- Use the flat end of a spudger to lift the battery connector straight up out of its socket on the logic board.

⚠ Be sure you lift up only on the connector itself, **not** the socket, or you risk permanent damage to the logic board.

## Step 6

- ☑ Bend the battery connector up out of the way to prevent accidental contact with its socket during your repair.

## Step 7 — SSD

- Remove the single 2.9 mm T5 Torx screw securing the SSD to the logic board.

## Step 8

- Lift the free end of the SSD up slightly and pull the SSD straight out of its socket on the logic board.

⚠ Only lift the end of the SSD enough to allow you to pull it out—about 1/4".

To reassemble your device, follow these instructions in reverse order.
